For Your Child's Comfort + Safety

Offering the same plush comfort as our renowned Heavenly[®] Bed, the Heavenly[®] Crib by Westin promises a night of sound slumber for our youngest guests.

We ask that you follow the guidelines below to ensure your child's safety. For further assistance, please call Service Express[®].

- Make sure the spring-loaded locking pin is securely closed on the baseboard.
- Place the crib in an open space. Do not place near windows, glass doors, blinds, cords, electrical outlets or electrical equipment.
- Do not put pillows, adult sheets, adult blankets or toys in the crib.
- Know that the crib is not designed for children who can crawl out of it. It's for children under the age of two and no taller than 32 inches (81 cm).
- Remove this card before placing your child in the crib.

To reduce the risk of SIDS (sudden infant death syndrome), certain government safety organizations recommend the use of a sleeper instead of a blanket for infants less than 12 months of age. If a blanket is used, it is recommended that you place the baby with his/her feet to the foot of the crib and tuck a thin blanket around the crib mattress, covering the baby only as high as the chest.

- Asegúrese de que el pasador de bloqueo con resorte esté bien cerrado en el rodapié.
- Coloque la cuna en un espacio abierto. No la sitúe cerca de ventanas, puertas de cristal, cortinas, cuerdas, enchufes o equipos eléctricos.

- La cuna no está diseñada para niños que puedan trepar fuera de ella. Es para niños menores de dos años y de una estatura máxima de 81 cm.
- Remueva esta tarjeta antes de colocar a su niño en la cuna.

Para reducir el riesgo de SMSL (Síndrome de muerte súbita del lactante), ciertas organizaciones gubernamentales de seguridad recomiendan el uso de mamilucos en lugar de una manta para bebés menores de 12 meses. Si se utiliza una manta, se recomienda colocar al bebé con los pies al pie de la cuna y meter una manta delgada alrededor del colchón de la cuna, cubriendo al bebé solo hasta el pecho.

ADJUSTABLE DUMBBELL SAFETY INSTRUCTIONS

Do not move any of the yellow levers unless the handle weights are at rest on the base.

Make sure each yellow lever is located in one of the top or bottom notches before lifting the dumbbell.

Lift the dumbbell straight up from its base to ensure that nonselected weights are not lifted by mistake.

After lifting the dumbbell, make sure that the selected weights are secured to the handle; it is normal for weights to rattle slightly while on the handle.

Avoid contact with the yellow levers during exercise to avoid disengagement of the weights.

The minimum weight of each dumbbell is 3 pounds; the maximum weight is 24 pounds.
